EDUCATION

Northeastern University **Vancouver, BC**
Master of Science in Computer Science *Jan. 2023 - Apr. 2024*
University of Wisconsin-Madison **Madison, USA**
Master of Science in Economics *Sept. 2019 - Dec. 2020*
University of Illinois at Urbana–Champaign **Champaign, USA**
Bachelor of Science in Econometrics & Quantitative Economics *Jun. 2017 - May 2019*

SKILLS

Languages: Java, Python, C/C++, Golang, TypeScript, SQL, JavaScript/HTML/CSS, Verilog, XML, YAML, JSON
Cloud & DevOps: Git, Maven, Docker, AWS, Postman, A/B testing, CI/CD, JUnit, Jenkins, Jira
Concepts: AIGC, Linux, Cloud Computing, Distributed System, Database, Multi-threading, APIs, CPU Memory

PROFESSIONAL EXPERIENCE

ND Supplies Inc. **Vancouver, BC**
Data Analyst *Dec. 2024 – Present*

- Developed and automated **the ETL process in NetSuite ERP** to seamlessly upload sales data, eliminating manual input and increasing data flow speed by **20%.**
- Collected and cleaned over **50,000** raw cannabis sales records and **2,000+ SKUs** from various websites, preparing data for analysis in **Power BI** and integrating **ChatGPT**, enhancing reporting efficiency by **30%**.
- Implemented **machine learning models** to forecast sales and inventory trends, leveraging historical sales and inventory data to optimize stock levels, improve demand planning, and increase inventory turnover rate by **10%**.

Siu & Sons International Trading Corporation **Vancouver, BC**
Import Coordinator *Jun. 2024 – Dec. 2024*

- Managed supply chain operations using **SAP** to oversee **vendor relationships**, process **50+ purchase orders monthly**, track **200+ inbound shipments**, and handle import documentation, ensuring **99%** accuracy and timely deliveries.
- Initiated an internal warehouse management application using **React** for the front-end and **Django** for the back-end, improving inventory tracking efficiency by **30%**, while leveraging **AWS RDS** and **S3** for scalable and efficient data storage.
- Optimized the company website's front-end and back-end, improving load times by **40%** and refining the search algorithm from O(n) to O(log n) to enhance the user experience for over 10,000 users, using **JavaScript, CSS, HTML, and a PostgreSQL database**.

YDH Ideal International Group **Shanghai, China**
Logistics Coordinator *May 2023 – Aug. 2023*

- Designed 10+ **ETL data pipelines** using **MySQL** to process 600K+ logistics records, improving data extraction and reporting efficiency by **47%**.
- Created and managed data dashboards and analysis systems using **Tableau**, generating real-time reports that supported seamless operations for **500+** users during both regular and peak periods, improving operational efficiency by **25%**.
- Conducted in-depth analyses using **Python** to address international logistics challenges and opportunities, collaborating with the IT department to develop internal software for risk identification, predictive insights, and ROI evaluation.

University of Calgary - Department of Economics **Calgary, AB**
Teaching Assistant (Studied as a PhD student) *Sept. 2021 – May 2022*

- Assisted in developing and delivering an economics curriculum, tracking **300+** students' progress, improving performance by **25%**.
- Prepared teaching materials, led tutorials, and provided one-on-one support for students to reinforce key concepts.

Bank of Ningbo Co., Ltd. - Shanghai Branch **Shanghai, China**
Data Analyst (Management Trainee) *Jan. 2021 – Aug. 2021*

- Calculated and processed monthly payroll for salaried and hourly employees, maintained accurate employee information in the internal system for payroll and HR records, and issued ROEs in compliance with employment standards requirements.
- Deployed analytics solutions in wealth management using **Power BI**, conducted **A/B testing**, and optimized investment targeting strategies, leading to a **6%** increase in customer ROI.
- Utilized **SQL** to clean and organize candidate data in the database, streamlining recruitment in the Human Resources department, enhancing match accuracy by **30%**, and reducing screening time by **20%**.

PROJECTS

Grocery Price Tracker Mobile App JavaScript, React Native, CSS, Firebase, Node.js, CI/CD *Jan. 2024 – Apr. 2024*

- **Established a cross-platform mobile app** with a polished, user-friendly interface using **React Native**, **JavaScript**, and **CSS** for responsive styling, ensuring a consistent and interactive experience across iOS and Android platforms.
- **Integrated advanced geolocation features** using **Google Places API** and device GPS capabilities to provide users with real-time access to nearby grocery stores and live price comparisons.
- **Built a scalable backend** with **Node.js** and **Firebase**, utilizing **Firebase Authentication** for secure access management, **Firebase Realtime Database** for real-time price tracking, and **Firebase Storage** for efficient image handling.
- **Implemented CI/CD pipelines** with **GitHub Actions** to automate testing, build, and deployment processes, ensuring rapid and reliable updates across development, staging, and production environments.

Video Selection Website MongoDB, React, Node.js, RESTful API, JavaScript, Fullstack *Jun. 2023 – Aug. 2023*

- **Engineered a responsive user interface** using **React.js**, providing an intuitive and seamless experience for users to search, browse, and play videos with minimal load times.
- **Developed a robust backend** using **Node.js**, designing efficient API endpoints to manage server-side logic and handle secure, optimized interactions between the front-end and the YouTube API.
- Applied **Test-driven Development (TDD)** methodology to introduce new features and enhance code quality, resulting in a notable 30% improvement in overall code quality.
